Personal Statement

Full Stack Development and Machine Learning experiences using industrially used tools through implementation in academic and self-taught projects. Developed applications maintaining optimizations and reliability. Looking forward to corporate experiences. Strongly confident about task accomplishments. Carries side interest in digital marketing and social media management.

Skills

- Workflow Automation with n8n
- Proficient with Machine Learning models
- API Integration Development
- System Testing & Debugging
- SQL & Data Querying
- Database design, migration, and optimization
- Frontend & Backend development with error handling
- Data Pipelines & Processing

Programming Languages

Python, Java, PHP, JavaScript & SQL

Frontend & UI/UX

HTML, CSS, JavaScript/TypeScript, React, Vue.js, React Native, Bootstrap, Tailwind CSS, UI/UX Design, Figma, WordPress, Shopify, Wix, Google Sites

Backend, APIs & Databases

Node.js, Laravel, MERN, MySQL, PostgreSQL, Supabase, Firebase, Strapi, Neo4j, Graph Database, n8n, OpenAI APIs, REST APIs, FastAPI, XAMPP

AI/ML, DevOps & Development Tools

Prompt Engineering, Node.js, Docker, Hugging Face, TensorFlow, Scikit-learn, Linux, Git, GitHub, Postman, Render, Netlify, VS Code, NumPy, Thunkable, Transformer Models, Reinforcement Models

Marketing, CRM & Social Media

CRM tools, social media management, digital marketing & content strategy, campaign planning and audience engagement

Education

MSc in Applied Artificial Intelligence (2025–2026)

Institution: University of Huddersfield

BSc in Computer Science and Engineering (2021–2024)

Minor: General Management

Institution: Independent University, Bangladesh

Location

Willing to relocate to job location

Right to Work

Eligible for Full Time. Switching to Graduate Visa soon

Projects

AI/Machine Learning

- Multi-Category Hate Detection - Transformer-based machine learning models with contextual bandit and adversarial testing (Dissertation Project)
- Interactive Library Robot - designed and built from hardware through to software, with a semantic search system and ChatGPT API integration (Thesis Project)
- Hate-Intensity Detection - built using Topic Modelling (LDA) & Fuzzy Decision Systems
- UK Used Car market analyzer - ML models prediction, comparison and analyzed with MAPE-derived accuracy
- E2E Product Categorizer - end-to-end product categorisation using a trained ML model

Full Stack & Web Development

- LC Management System - letter-of-credit management for banking with Java
- Graph Relationship Management System - Laravel backend with a Neo4j graph database
- Personal Portfolio - built with Vue.js
- Accessible Telemedicine Application - a web application connecting doctors and patients through PHP
- Staff Platform - CRUD based MERN stack storage application for staff use
- Weather Application — Full stack application, built with PHP for collecting and updating weather reports

Strenths and Weaknesses

- **Strength** - Stays positive under pressure and handles difficult situations with patience.
- **Weakness** - When deeply involved in a project, can lose track of time while the work more precisely.

Employment History

- Social Media Manager
- Customer Support Agent
- Warehouse Operative
- SIA Door Supervisor

Certificates

- **OOP Project (Runners-Up)**
  University: Independent University, Bangladesh
- **AI Engineering Hackathon**
  Company: Poridhio.io
- **Dean Merit List**
  University: Independent University, Bangladesh
- **MERN Stack Development**
  Company: Creative IT Institute
- **CCNAv7: Introduction to Networks**
  Company: Cisco Networking Academy
- **Milestone in the Revenue to Rewards Program on Applink**
  Company: Banglalink
- **Dean List - 4 times**
  University: Independent University, Bangladesh
- **Soccerbot Competition**
  University: Ahsanullah University of Science and Technology
- **Soccerbot Competition**
  University: Dhaka University of Engineering & Technology

Research Papers

- **Museum Guidance Robot**
  26th International Conference on Human Computer Interaction (HCII 2024)
- **Cultural Robotics**
  Second International Workshop on Cultural Robotics (CR 2025) at HRI '25
- **Interactive Library Robot**
  2025 ACM/IEEE International Conference on Human-Robot Interaction (HRI '25)
- **mHealth Service App**
  6th International Conference on Mobile Computing and Sustainable Informatics (ICMCSI 2025)
